# The Email Encryptor

We all need our contact email address on our websites, to allow people to get in touch with us, only you find that you begin to get bombarded with spam, Viagra, Prescription drugs, scam emails promoting huge lottery wins....the list endless.

## WE'LL NOT ANYMORE!

I have a very special Free Tool **Just for YOU!** It is The **Email Encryptor**..... a desktop application that will instantly encrypt your email address, it is very simple to use.....You will now be safe from spam bots and scraper software that harvest your email address.

### Step 1

Go to <http://taradipalma.com> enter your name and email to get your free copy of the Email Encryptor software, this will ensure that you get any future updates of the software and additional free step by step tutorials.

### Step 2

You will receive a welcome message containing a confirmation link; you need to click this link to confirm your subscription.

### Step 3

You will then receive your download link.

### Step 4

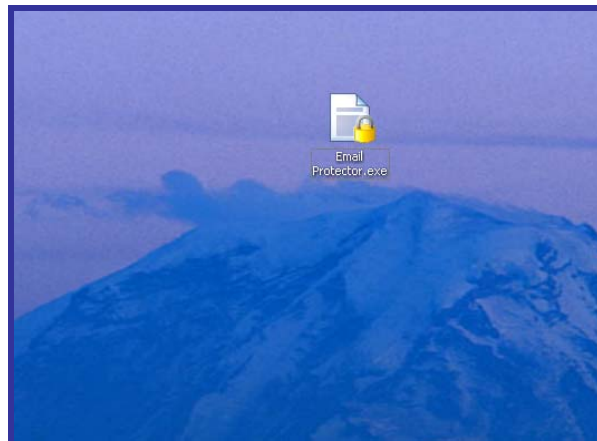

Download your Free Email Encryptor program, it is now time to put your mind at peace and know that you are no longer exposed to spam bots and scraper software ☺

# Start encrypting your Email address TODAY!

Just follow the steps below.

- ✚ You will be given a download link to the Email Encryptor software once you have confirmed your request.
- ✚ You will receive a zip file.
- ✚ You will need an unzip program, if you haven't got one you can get one free [here](#) it is called zip genius.
- ✚ Once you receive your zip file you can save it in a folder on your hard drive.
- ✚ Go to the folder where you saved it and right click on the zip.
- ✚ Select extract here.

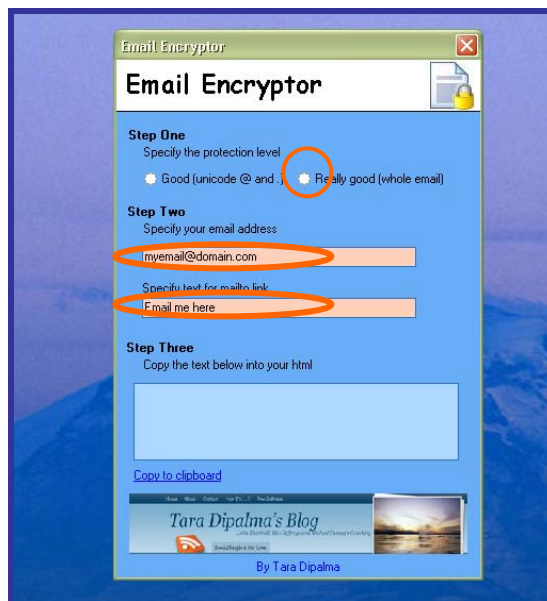

Once you have unzipped the program you will see an icon like the one below.  
Double left mouse click on it.

The Email Encryptor program will open as shown in the screen shot.

Click on Unicode my address-->>

Step One: - Click inside the circle next to REALLY GOOD (WHOLE EMAIL)

Step Two: - Enter your email address

Step Three: - Specify text for the mailto link....

Here you could put anything e.g.:-

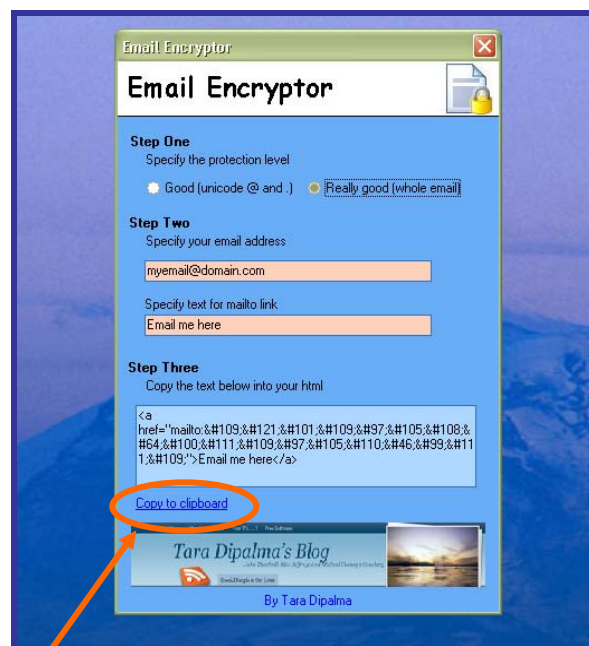

Contact me

Click here to email me

Send me an email  
Click here for help

This is the text that will appear on your webpage that is linked to your email address.

As you enter your details you will see the code appear in the html box below.

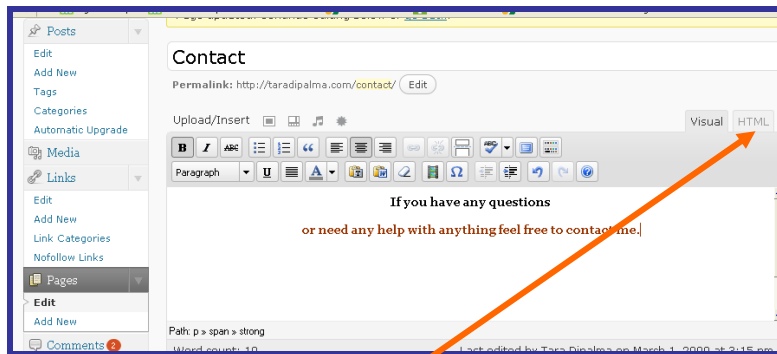

You can either select copy to clipboard then paste the code onto a text document or directly into your web page or blog.

It would be a good idea to save a text file with this code as a template.

# Now lets enter this code into your wordpress blog

For this example I will post the code into my blog, the same process is used for a webpage.

Create a new page call it "contact"

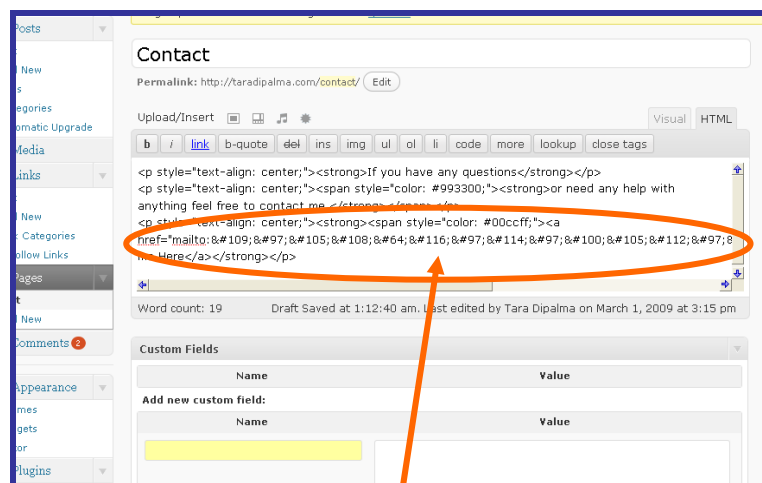

Enter your introduction

Then click on the HTML view button

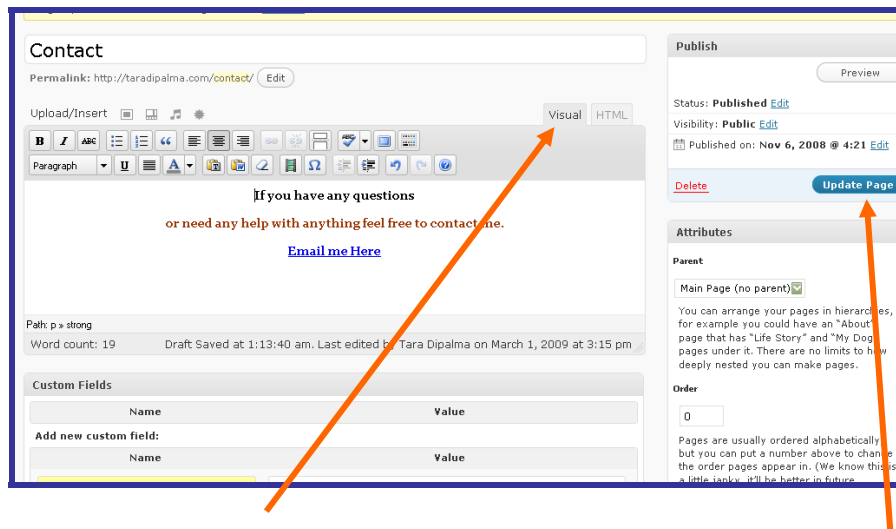

Click at the end of the code already inside the post

Hit return

Then right mouse click and select paste.

You will see your code entered into the body of the post.

Click on the Visual Tab, if you are happy with the display click Update page.

That's all there is to it ☺

I hope this tutorial helped you 😊 again if you have any problems or comments please leave a post at my blog <http://taradipalma.com> and I will get back to you asap 😊

To Your Success!
